●Project Portfolio: Portfolio-Website

Professional Summary

Data Analyst with **13+ years of experience** in analytics, automation, and product intelligence. Skilled in **Python, Machine Learning, Power BI, and ML model deployment**, with experience building automated data pipelines and decision-support dashboards.

Core Skills & Tools

Programming: Python, SQL, PySpark
Data Science: Scikit-Learn, Pandas, NumPy, TensorFlow
Machine Learning: Feature Engineering, Model Deployment, Hyperparameter Tuning
Visualization: Power BI, Tableau, Excel, Matplotlib, Alteryx
Big Data: Azure Data Studio
Data Processing: ETL Pipelines, Data Cleaning, Data Validation
Tools & Platforms: VS Code, GitHub, Streamlit, KNIME

Python & Machine Learning Projects

Machine Learning Model Deployment github.com/VikramVadhirajan/ML_Projects

• Built a **complete ML deployment pipeline** including preprocessing, encoding, model training, and inference.
• Created reusable Python modules for **data cleaning, encoding, outlier detection, and feature transformation**.
• Implemented **pickle-based model persistence** for deployment environments.
• Developed **Streamlit interface for model prediction and probability outputs**.
• Structured project using modular architecture for production-ready ML pipelines.
Technologies: Python, Scikit-Learn, Streamlit, Pandas, Pickle

Python Automation Scripts Library github.com/VikramVadhirajan/Python_Scripts

• Built a collection of **Python automation scripts** for **XML→Excel conversion, Excel data cleaning/transformation, and web scraping** using **Pandas, and Selenium**.
• Developed reusable utilities for **data extraction, fuzzy text matching, QR generation, and image processing**, automating repetitive data tasks.
Technologies: Python, Pandas, Selenium, Numpy

Professional Experience

03/2025-present

Tools Used
Python
Power BI

Senior Data Analyst- Product Support- First Brands Group, Bengaluru

• Reduced Techline call rejections by **20%** by developing automated performance dashboards and workforce insights.
• Improved customer data quality from **20% to 95%** by integrating multi-source datasets and implementing standardized mapping rules.
• Automated warranty reporting using Python scripts extracting data from **O'Reilly, NAPA, and Advance Auto Parts**, eliminating **30+ manual hours monthly**.
• Built a **Python + Streamlit tool** to extract and transform **ACES and PIES XML product catalog data** into multi-sheet Excel outputs.

10/2023- 03/2025
Tools Used
Python
Power BI
Tableau
MS Office
Microsoft Azure

Desktop Research Analyst- Product Innovation- First Brands Group, Bengaluru

• Increased product application coverage by **6%** through vehicle-in-operation data analysis.
• Performed **competitive intelligence analysis** using web scraping across Amazon, Walmart, eBay, and O'Reilly Auto.
• Conducted **customer sentiment analysis on Amazon reviews** to identify brand perception and pricing insights.
• Mentored junior analysts in Python programming and analytics workflows.

Vikram Vadhirajan

● linkedin: linkedin.com/in/vikram-vadhirajan ●GitHub: github.com/VikramVadhirajan

●Project Portfolio: Portfolio-Website

10/2022- 10/2023 **Tools Used:** Power BI KNIME Python MS Office SAP	**Data Analyst Testing and Validation- ZF Group India, Chennai** • Developed Power BI apps with **dynamic row-level security (RLS)** for role-based access control. • Built plan-vs-actual performance dashboards maintaining KPI variance within **±5%**. • Automated executive dashboards reducing manual reporting effort by **5 hours daily**. • Delivered advanced Excel training across teams enabling self-service analytics.
05/2019 – 09/2022 (Added Resp.)	**Data Engineering / Resource Planning, ZF India Limited, Chennai** • Developed **Power BI dashboards integrating SAP and PLM data** to track KPIs, engineering performance, and resource utilization for leadership reporting. • Managed **resource planning, demand–supply forecasting, and project cost tracking**, supporting data-driven operational and financial decisions.
02/2018 – 09/2022	**Technical Project Manager, ZF India Limited, Chennai** • Led engineering project execution from **RFQ to validation**, ensuring delivery targets for quality, cost, and timeline across global automotive programs. • Managed **PLM change processes and product cost analysis**, coordinating engineering changes and validation activities.
07/2012-01/2018 **Tools Used:** MS Office Creo 4.0 ANSYS v14.5	**Lead Engineer, Turbo Energy Private Limited, Chennai** • Designed turbocharger components using **Creo and ANSYS**, supporting simulation-driven product development and prototype validation. • Collaborated with global teams on **benchmarking, concept design, and engineering validation**, including onsite work in Germany.

Educational Qualification

02/2024-06/2025	Master of Data Science (Global) Deakin University Transcript
04/2021-06/2022	PGP in Data Science and Business Analytics from University of Texas GPA -3.94/5 -Certificate- *Academic e-portfolio- PGP DSBA- GL*
07/2008-05/2012	Bachelor of Technology in Mechanical Engineering from SASTRA University, Tanjore with CGPA-8.68

Additional Interests/ Certification

Language	• Deutsch- Goethe-zertifikat B1 (2015), from Goethe institute Chennai. • English - IELTS Academic 7.0 (2016), from British Council Chennai • Tamil, Tulu (mother tongue), and Kannada
Data Science	• Power BI A-Z: Hands-On Power BI Training for Data Science- Udemy • Tableau 2020 A-Z: Hands-On Tableau Training for Data Science- Udemy
